Operations & Financial Data Controller | Back-Office Automation Specialist

Fractional B2B Contractor (Osek Patur — 20–25 h/week | No VAT, No Allocation Numbers / מספרי הקצאה Required)

VALUE PROPOSITION FOR STARTUPS & SMBs

Detail-obsessed Operations and Financial Data Analyst with 7+ years of experience bringing institutional order to complex, fast-moving environments. I take full ownership of time-consuming back-office operations—**vendor invoice-to-payment tracking, BOM/quote preparation (כתבי כמויות), ERP/Excel reconciliation, budget control, and process automation**—freeing Founders and C-level executives to focus on core R&D and growth.

CORE OPERATIONAL CAPABILITIES

- **Financial Back-Office & ERP Control:** 100% accuracy in managing pricing tables, vendor invoices, expense tracking, and cross-departmental financial reconciliation.
- **Procurement, BOM & Quotes Support:** Meticulous preparation and validation of bills of materials (כתבי כמויות), price quotes (הצעות מחיר), and supplier documentation for Hardware, MedTech, and DeepTech teams.
- **No-Code / AI Workflow Automation:** Eliminating manual copy-pasting between WhatsApp, Email, Excel/Google Sheets, Monday.com, and ERP systems using automated pipelines (Python / n8n / AI parsing).
- **Lean Operations & Bottleneck Resolution:** Root cause analysis (RCA) of operational workflows, inventory/resource prioritization under peak load, and strict SLA compliance.

WORK EXPERIENCE

- **Independent Systems & Operations Analyst (B2B / Projects) | Haifa, Israel (2024 – Present)**
  - Designed automated data-validation and document-auditing workflows using Python and LLM APIs, reducing manual verification time by ~40%.
  - Applied Lean Management and Root Cause Analysis to high-load operational pipelines in local hospitality/service environments, optimizing cycle times and inventory throughput.
- **Lead Data & Operations Analyst | Leading Private Oncology Center (07/2014 – 01/2021)**
  - **ERP Pricing & Financial Auditing:** Served as the primary ERP (1C) power user managing complex service pricing structures and ensuring 100% data alignment between operational units and the accounting department.
  - **Cross-Departmental Operations Control:** Audited workflows across Lab, Diagnostics, Call Center, and Administration; identified financial/scheduling anomalies and reported directly to the Board.
  - **Resource & Slot Optimization:** Conducted quantitative analysis of scheduling bottlenecks, optimizing resource allocation and improving throughput.

EDUCATION & CERTIFICATIONS

- **B.Sc. in Applied Analytics & Information Systems** — Institute of International Relations (IIR)
- **ISTQB® Certified Systems Quality Analyst** — Israel, 2024

TOOLS & LANGUAGES

- **Toolkit:** Advanced Excel & Google Sheets (Complex Formulas, Pivot, Data Validation), ERP Systems (1C / Priority concepts), Monday.com, Jira, SQL, n8n, Python.
- **Languages:** Written Hebrew (Working Proficiency for Documents, Invoices & Correspondence), English (Fluent Professional), Russian (Native).
