AI QA & Trust Engineer | Workflow Automation & Systems Analyst

Available for Fractional B2B Contracts (Osek Patur — 20–25 h/week, Zero Employer Overhead) & Full-Time Roles

EXECUTIVE SUMMARY

Results-oriented AI QA Engineer and Systems Analyst with 7+ years of experience in high-stakes clinical and financial data auditing. Specialized in LLM observability, Human-in-the-Loop (HITL) evaluation, data sanitization, and business process automation. Helps Seed and Series A startups eliminate AI hallucinations, validate complex RAG/Agentic pipelines, and automate routine operations without expanding full-time R&D payroll.

FEATURED ENGINEERING PROJECTS

- **MediTrust AI Firewall | Semantic Safety Layer & LLM Observability Pipeline (03/2025 – Present)**
  - Architected a zero-trust Semantic Guardrail system using **GPT-OSS-120B (Groq API)** with an **Agentic Reflection Loop** to intercept high-stakes clinical hallucinations and prompt injections.
  - Built an automated **CI/CD Observability Pipeline (GitHub Actions)** generating structured Markdown audit reports (`test_report.md`) with strict binary routing (Block/Allow) and rate-limit resilience.
  - *Tech Stack:* Python, Groq API, LLM-as-a-Judge, JSON Schema Validation, GitHub Actions, Secure Logging.
- **QA Master Architecture & Process Automation (11/2024 – Present)**
  - Designed structured prompt-engineering and workflow templates (n8n / API integrations) to standardize bug reporting, test case generation, and cross-system data synchronization (~40% cycle time reduction).

PROFESSIONAL EXPERIENCE

- **Lead Data & Systems Analyst | Leading Private Oncology Center (07/2014 – 01/2021)**
  - **Data Integrity & Anomaly Detection:** Conducted cross-departmental data audits (Lab, Radiology, Surgery, Finance) to detect systemic anomalies and prevent operational bottlenecks.
  - **ERP & Financial Synchronization:** Managed complex pricing structures and data validation within ERP systems, ensuring 100% consistency between clinical scheduling and financial reporting.
  - **Workflow Mapping (Ipyun):** Translated complex multi-departmental real-world workflows into deterministic technical specifications and data algorithms.

CERTIFICATIONS & EDUCATION

- **ISTQB® Certified Tester (Foundation Level)** — Israel, 03/2024
- **Manual & Automation QA Certification** — Tel-Ran, Israel (09/2022 – 02/2024)
- **B.Sc. in International Information & Applied Analytics** — Institute of International Relations (IIR)

TECHNICAL & ANALYTICAL TOOLKIT

- **AI & Automation:** LLM QA (Hallucination & Groundedness Testing), Golden Dataset Sanitization, Prompt Engineering, n8n Workflow Automation, Python, JSON/REST API (Postman).
- **QA & Systems Analysis:** System Characterization (Ipyun), Root Cause Analysis, SQL (MySQL), Git, Docker, CI/CD (GitHub Actions), Jira, Agile/Scrum.
- **Languages:** English (Full Professional), Hebrew (Written Working Proficiency / Basic Spoken), Russian (Native).
